

Analysis by Sector

The 5 sectors hit hardest by covid-19 account for 73% of total job loss, while accomodation and services industry accounts for 39% of total job loss across the country

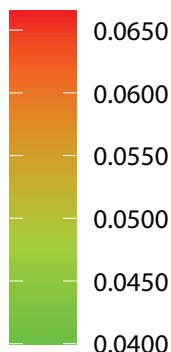

Analysis by Region

The US was divided into regions based on US census region classification. The Northeast (NE), East North Central (ENC), and Pacific Northwest (PW) regions showed the largest job loss per capita

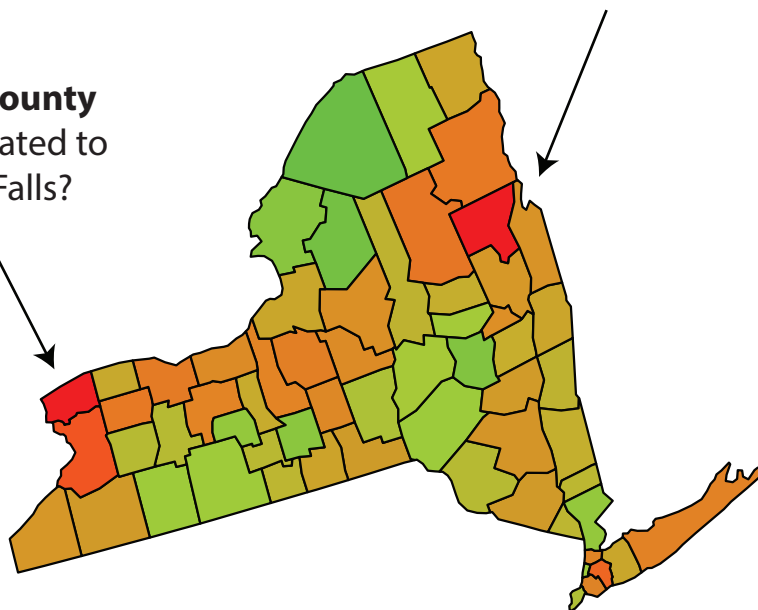

County Analysis

Job Loss Per Capita

Niagara County
Tourism related to
Niagara Falls?

Warren County
Tourism related to
Lake George?

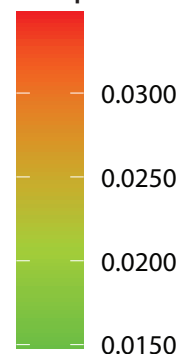

Ramsey County

Population
~11,000

Cass County

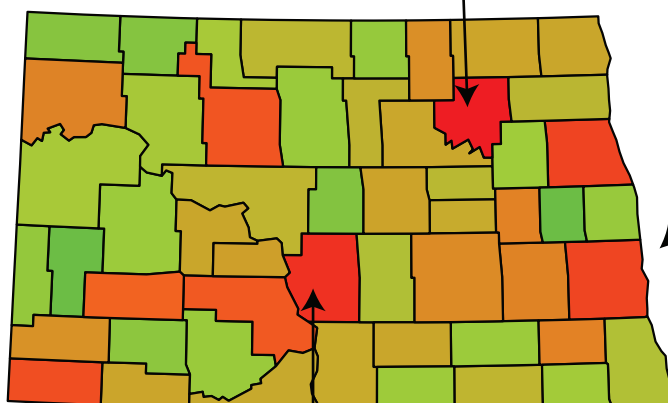

Fargo, ND
most populous ND
city

Job Loss Per
Capita

Burleigh County

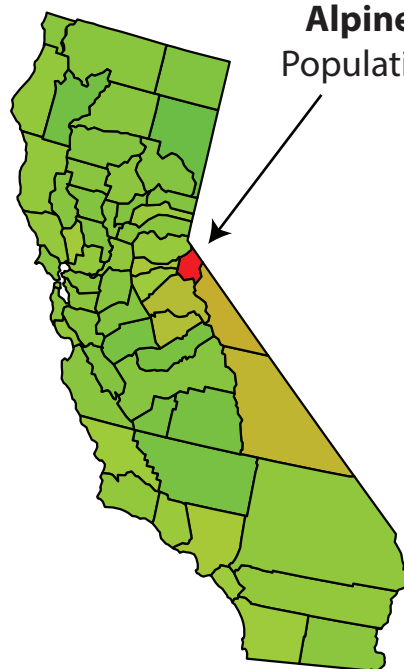

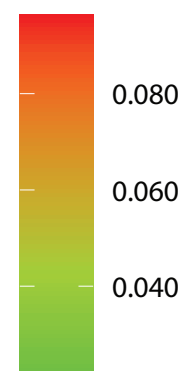

Bismarck, ND
2nd most popu-
lous ND city

Alpine County

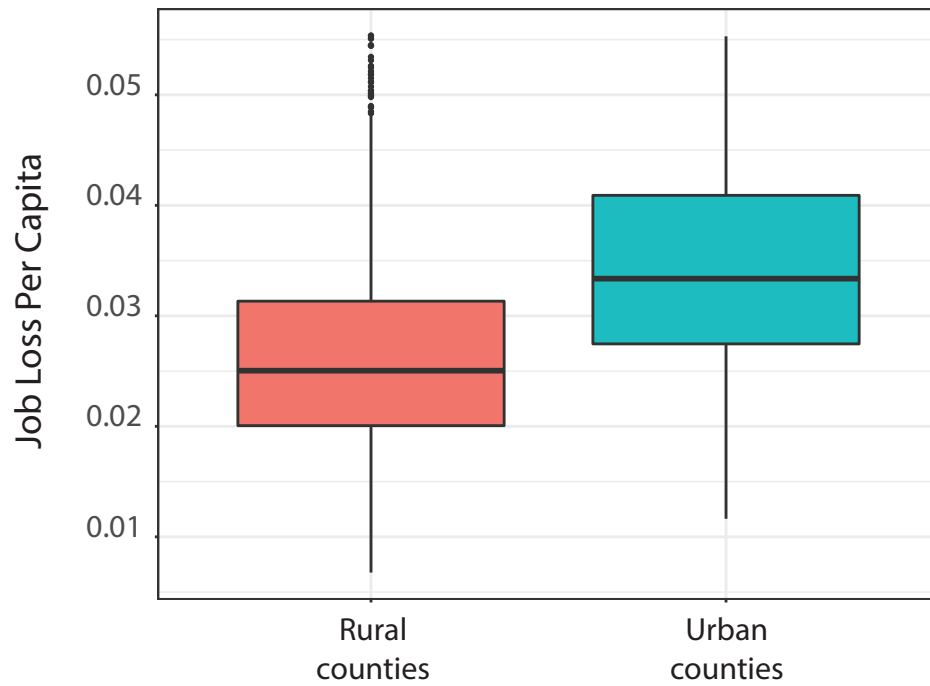

Population ~1,000

Job Loss Per
Capita

A look at three states randomly chosen (NY, ND, CA) shows that the largest job loss per capita can occur in rural or urban centers. Some of the counties hardest hit may only be noted as they have such a small population. There is also evidence that areas associated with tourism show large job loss

Rural-Urban Analysis

*Urban counties were defined as having more than the median county population while Rural counties were defined in having less than the median
