A look a three states randomly
chosen (NY, ND, CA) shows
that the largest job loss per
capita can occur in rural or
urban centers. Some of the
counties hardest hit may only
be noted as they have such a
small population. There is also
evidence that areas associat-
ed with tourism show large
job lss

Rural-Urban Analysis
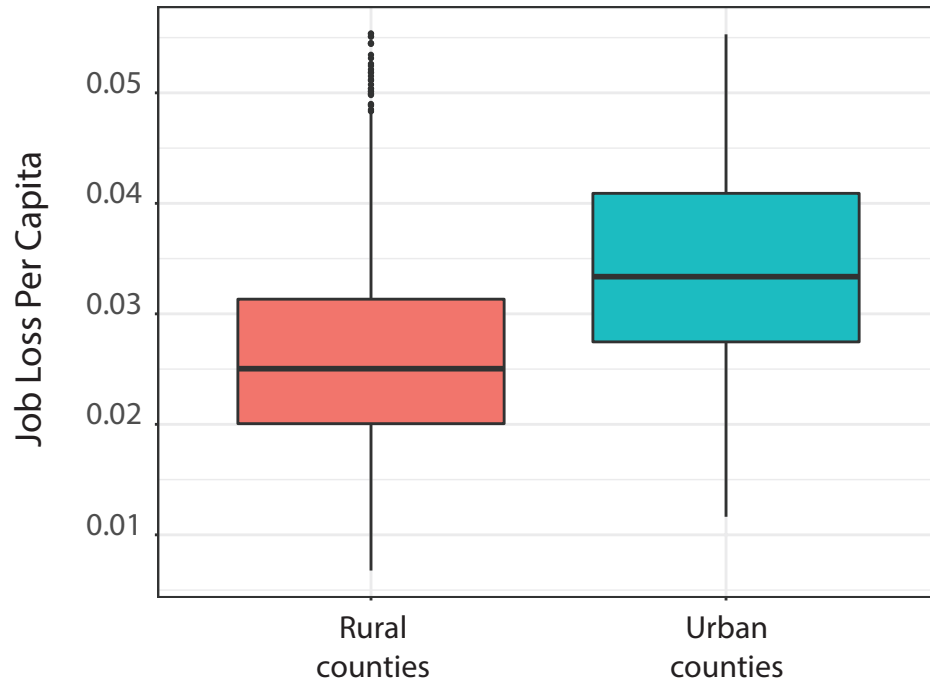

*Urban counties were defined as having more than the median county population while Rural counties were defined in having less than the median
